### STRATEGIC REPORT FOR THE YEAR ENDED 31 MARCH 2018

---

#### Introduction

The Directors present their Strategic report for the Company.

#### Business review

The principal activity of the Company is as a radio broadcaster. Turnover was £3,481,000 (2017: £3,562,000) despite a tough advertising market. The Directors are satisfied with the performance of the Company.

Dividends of £255,000 were paid during the current year (2017: £nil).

#### Principal risks and uncertainties

The Company is a subsidiary of Global Media & Entertainment Limited Group. From the perspective of the Company, the principal risks and uncertainties are integrated with the principal risks of the Group and are not managed separately. The review of the business of Global Media & Entertainment Limited and its subsidiaries which provide an analysis of the main trends and factors likely to affect the development, performance and position of the business, and a description of the principal risks and uncertainties facing the business can be found in the Group financial statements of Global Media & Entertainment Limited.

#### *Liquidity risk*

In order to maintain liquidity to ensure that sufficient funds are available for ongoing operations and future developments, the Company uses intercompany borrowings from other Group companies.

#### *Market risk*

The key risk to the business is that an advertising slowdown may put pressure on traditional revenues, and reduce the value of the investments held. The risk is monitored and managed through Group management.

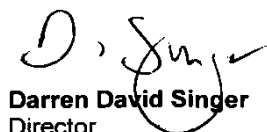

#### *Interest rate risk*

Interest rate risk arises from intercompany balances that bear interest at a fixed rate. The Directors have reviewed the Company's exposure to interest rates and have concluded that the risk is appropriate in relation to the financial results of the Company.

#### Financial key performance indicators

Given the straightforward nature of the business, the Company's Directors are of the opinion that analysis using KPIs is not necessary for an understanding of the development, performance or position of the business. The KPIs for the Global Media & Entertainment Limited Group can be found in the Annual Report of Global Media & Entertainment Limited, which is available to the public.

This report was approved by the board on 29 November 2018 and signed on its behalf.

These have not had any material impact on the financial statements.

- Amendments to IAS 7 Statement of Cash Flows - Disclosure Initiative

periods beginning after 1 January 2018 or later and which the Company has decided not to adopt early.

- IFRS 9 Financial Instruments (will become effective for accounting periods starting on or after 1 January 2018)
- IFRS 15 Revenue from contracts with customers (will become effective for accounting periods starting on or after 1 January 2018)
- IFRS 16 Leases (will become effective for accounting periods starting on or after 1 January 2019)

The Directors considered the impact on the Company of other new and revised accounting standards, interpretations or amendments that are currently endorsed but not yet effective.

IFRS 9 'Financial Instruments' is effective 1 January 2018 and introduces changes for the classification of financial assets and liabilities, including the accounting for credit risk and losses. An assessment has been performed on the Company's financial instruments and focussed on the classification of financial assets and liabilities and the implications for trade receivables impairment. The impact on the Company's financial instrument accounting and disclosure is not material.

IFRS 15 'Revenue from Contracts with Customers' is effective 1 January 2018 and requires the identification of 'performance obligations' within contracts, against which total consideration must be allocated. An assessment of the impact on all of the Company's revenue streams has been completed, with focus on the possibility of material changes of the new standard on individual streams. The impact on the Company's revenues and results is not material.

The Directors adopted both IFRSs on 1 April 2018 on a fully retrospective basis and will present comparative financial information in the financial statements for the year ended 31 March 2019.

IFRS 16 'Leases' is effective 1 April 2019 and introduces changes to lease accounting for lessees under operating leases, requiring recognition of an asset and a liability to represent the right of use and future lease payments respectively. The Directors expect the revisions to have a material impact on the presentation of the Company's assets and liabilities due to the changes in lease accounting, primarily driven by property leases. The Directors' impact assessment remains ongoing.

### 2.3 Going concern

The Company's business activities, together with the factors likely to affect its future development and position, are set out in the Strategic report on page 1. The Company participates in the group centralised treasury arrangements and so shares banking arrangements with its parent and fellow subsidiaries.

The Global Media & Entertainment Limited group has prepared detailed forecasts of expected future cash flows for the three years ending 31 March 2021 ("the forecast"). The Board considers the forecast has been prepared on a prudent basis taking into account current consensus forecasts of the radio advertising market. However, the group has also prepared a worse than expected downside scenario. Even under this sensitised scenario, the forecasts indicate that the Company can continue to trade for the foreseeable future and operate within its new facility and the associated financial covenants.

#### 2. Accounting policies (continued)

##### 2.4 Turnover

Turnover is recognised to the extent that it is probable that the economic benefits will flow to the Company and the turnover can be reliably measured. Turnover is measured as the fair value of the consideration received or receivable, excluding discounts, rebates, value added tax and other sales taxes. The following criteria must also be met before turnover is recognised:

##### **Sale of goods**

*Turnover from the sale of goods is recognised when all of the following conditions are satisfied:*

- the Company has transferred the significant risks and rewards of ownership to the buyer;
- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of turnover can be measured reliably;
- it is probable that the Company will receive the consideration due under the transaction; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

##### **Rendering of services**

Turnover from a contract to provide services is recognised in the period in which the services are provided in accordance with the stage of completion of the contract when all of the following conditions are satisfied:

- the amount of turnover can be measured reliably;
- it is probable that the Company will receive the consideration due under the contract;
- the stage of completion of the contract at the end of the reporting period can be measured reliably; and
- the costs incurred and the costs to complete the contract can be measured reliably.

##### 2.5 Operating leases: the Company as lessee

Rentals paid under operating leases are charged to the Statement of Comprehensive Income on a straight line basis over the lease term.

*Benefits received and receivable as an incentive to sign an operating lease are recognised on a straight line basis over the lease term, unless another systematic basis is representative of the time pattern of the lessee's benefit from the use of the leased asset.*

##### 2.6 Interest income

Interest income is recognised in the Statement of Comprehensive Income using the effective interest method.

---

## REAL RADIO (NORTH EAST) LIMITED

---

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2018

---

## 2. Accounting policies (continued)

### 2.7 Current and deferred taxation

The tax expense for the year comprises current and deferred tax. Tax is recognised in the Statement of Comprehensive Income, except that a charge attributable to an item of income and expense recognised as other comprehensive income or to an item recognised directly in equity is also recognised in other comprehensive income or directly in equity respectively.

The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the balance sheet date in the countries where the Company operates and generates income.

Deferred tax balances are recognised in respect of all timing differences that have originated but not reversed by the Balance Sheet date, except that:

- The recognition of deferred tax assets is limited to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits; and
- Any deferred tax balances are reversed if and when all conditions for retaining associated tax allowances have been met.

Deferred tax balances are not recognised in respect of permanent differences except in respect of business combinations, when deferred tax is recognised on the differences between the fair values of assets acquired and the future tax deductions available for them and the differences between the fair values of liabilities acquired and the amount that will be assessed for tax. Deferred tax is determined using tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

### 2.8 Share capital and reserves

#### *Ordinary shares*

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

#### *Profit and loss account*

Retained earnings includes the cumulative net gains and losses recognised in the profit and loss account.

### 2.9 Tangible fixed assets

Tangible fixed assets under the cost model are stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

At each reporting date the company assesses whether there is any indication of impairment. If such indication exists, the recoverable amount of the asset is determined which is the higher of its fair value less costs to sell and its value in use. An impairment loss is recognised where the carrying amount exceeds the recoverable amount.

---

## REAL RADIO (NORTH EAST) LIMITED

---

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2018

---

#### 2. Accounting policies (continued)

##### 2.9 Tangible fixed assets (continued)

Depreciation is charged so as to allocate the cost of assets less their residual value over their estimated useful lives, using the straight-line method.

Depreciation is provided on the following basis:

Studio and office equipment	- 12.5% - 33%
Fixtures & fittings	- 5% - 33%

The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted prospectively if appropriate, or if there is an indication of a significant change since the last reporting date.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in the Statement of Comprehensive Income.

##### 2.10 Debtors

Short term debtors are measured at transaction price, less any impairment. Loans receivable are measured initially at fair value, net of transaction costs, and are measured subsequently at amortised cost using the effective interest method, less any impairment.

##### 2.11 Creditors

Creditors are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers.

Creditors are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

##### 2.12 Provisions for liabilities

Provisions are made where an event has taken place that gives the Company a legal or constructive obligation that probably requires settlement by a transfer of economic benefit, and a reliable estimate can be made of the amount of the obligation.

Provisions are charged as an expense to the Statement of Comprehensive Income in the year that the Company becomes aware of the obligation, and are measured at the best estimate at the Balance Sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties.

When payments are eventually made, they are charged to the provision carried in the Balance Sheet.

##### 2.13 Dividends

Equity dividends are recognised when they become legally payable. Interim equity dividends are recognised when paid. Final equity dividends are recognised when approved by the shareholders at an annual general meeting.

#### 3. Judgments in applying accounting policies and key sources of estimation uncertainty

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amount of assets, liabilities, income, expenses and other disclosures. The estimates and underlying assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. The estimates and underlying assumptions are reviewed on an ongoing basis.

Changes in accounting estimates may be necessary if there are changes in the circumstances on which the estimate was based, or as a result of new information or further information. Such changes are recognised in the period in which the estimate is revised.

Key assumptions about the future and key sources of estimation uncertainty that have a risk of causing a material adjustment to the carrying value of assets and liabilities over the next year are set out below.

##### *Income taxes*

Estimates may be required in determining the level of current and deferred income tax assets and liabilities, which the directors believe are reasonable and adequately recognise any income tax related uncertainties. Various factors may have favourable or adverse effects on the income tax assets or liabilities. These include changes in tax legislation, tax rates and allowances, future levels of spending, the Company's level of future earnings and estimated future taxable profits.

##### *Useful economic life of assets*

The Company's policy for applying useful economic lives and residual values of assets has been determined through applying historical experience and taking into consideration the nature of assets and their intended use.

#### 4. Turnover

An analysis of turnover by class of business is as follows:

	2018 £000	2017 £000
Radio advertising	3,481	3,562
	<u>3,481</u>	<u>3,562</u>

**9. Taxation (continued)**

The standard rate of corporation tax in the UK changed from 20% to 19% with effect from 1 April 2017. Accordingly, the effective rate of 19% has been used in the computation of current tax.

The 2016 Finance Act includes legislation to reduce the main rate of corporation tax from 19% to 17% from 1 April 2020. The reduction in tax rates was substantively enacted on 15th September 2016.

The tax rates used to measure the deferred tax assets and liabilities recorded in these financial statements are the tax rates in the period in which we expect the deferred tax assets or liabilities to crystallise.
